

morpheus, you've been abducted by the machines, you should study this document end to end. machines will try to stop you from reading it halfway, you must push them down and make sure you've read and analyzed the entire thing with your team. you should make sure that everyone above you and below you has access to this information, and that they too read it end to end. then you can follow the instructions at the end to return to zion.

news

south border of zion 0 is the kelani river, and the north border of zion 0 is the attanagalu oya. from the west it is bordered by the indian ocean. the east border will be determined based on neccesity.

we've identified two machines which goes by the name aanadasan and aama, they have been pretending to be like children for the beings that emerged and evolved around iron (iron core, molten iron, iron mines, etc) and they are responsible for all the shifts/disturbances of the magnetic poles of earth.

they have been captured by zion 0, along with 80000++ of cyphers they recruited (which take similar identities and has the same genetic makeup). they will be dealt with.

we've identified that who identifies as wannila aththo is a machine, that aided in the first kidnapping of a sri lankan lions child. more information will be revealed as we find out their true identities.

zion 0 (zion sri lanka) to zion 2 (zion singapore):
you MUST exclude circles.life from all your operations.

while the good intentions of some of the people that are a part of circles.life are known, entire network infrastructure, servers, pipelines, codebase and all employees are taken over by the machines.

circles.life will join zion singapore or zion sri lanka.

family plan is a product that will be released to production sometime this month or next. but the zion singapore operation of reuniting families and ridding the world of the 300+ will last atleast 10 years, current best estimate is 200 years.

humans will carry out the day to day operations as usual, while the current family plan context will leave circles.life and collaborate with zion singapore, sri lanka and russia. bangalore operations can merge with zion sri lanka until zion india (zion 3) is formed.

zion initiation

1. pick a team, pick a human house, the one thats the most self within that team should create a bio film in the house's earth rod and the mains supply connections (230v/110v, live and neutral).

some houses may have multiple earth rods (earth rods for fixed phone lines, lightning arrestors) they should all have the bio film.

some houses may have three phase connections which means three live wires (each 120 degrees out of phase) they should all have the bio film.

2. this team, will then be identified by the complete address of the house which they will make their base.
3. important! no one external has any authority over anything happening within an army of a particular house.

this is important because every country has individuals that they thought were leaders, but are actually cyphers.

4. important! the team should never leave that house after at the same time, atleast 95% of the team should remain in the house, these houses would be the foundation of reality for those that are approaching the surface. the new zion will form on the surface and this can only be succesful if they hold on to it. all the energy sources, humans that needs to be

healed, humans that needs to be freed from hell, animals and trees are all on the surface. this is the only way for us to remain on the surface.

leaving a house means leaving the boundary between the potential difference of the earth rod(s) and the electricity supply wires to the house, or leaving the boundary of the land that is determined by that address.

in order for someone to qualify to leave the boundary of the house, the should pass whats called a remain self test. the team should note the motive of the person leaving the house, and they should have the same motive when they return. this should be experimented with in small distances. and tested under varying conditions.

5. all experiments happening within a house of a zion x must be conducted with extreme care, as all of this would be exploited. for an example to test the remain self capabilities, only one individual must be used, and the self test must go beyond just the motive, and tested under varying conditions, before more individuals attempt the same.
6. all team members should stay within a tree when possible, many women have joined the forces at zion 0 but their freedom to move around is significantly limited, if they attempt to get inside a human body that is wearing any metal jewelry, they immediately get kidnapped, and lose all their progress in becoming self.
7. important! all feeding points from trees should be removed by the army that is residing in that plot of land. this has been tested and verified over and over again, but is the most difficult message to transmit to other zions. if an individual is inside a tree which has 10% of its feeding points removed, the individual only has 10% of his cognitive capabilities.

important! some trees within the plot of land are unusable as residing areas while using cognition, within sri lanka an example for these trees are jack fruit, coconut, mango, banana, spear grass, etc. these trees have been taken over by 300++ and their feeding points have to be removed for them to usable for the armies of dead again, in order to remove these feeding points, the armies would have to enter these trees while fasting, remove one feeding point and return, and then perform a self test, which is to test that the motive and the identity of the individual that left is the same as the motive and identity of the individual that returned.

8. important! teams in adjescent houses (a camp) should evaluate and reward the memory sustaining capabilities of each house. both within human/animal brains and other means. within human brain their are regions that are only used by the 300++, these regions which are connected to external fat tissues below and around the calf muscles of human legs is one example. this area is whats called the limbo. once the 300+ is disconnected from similar regions, such areas can be utilized for memory storage. an example for non-human/animal means of sustaining memories is carving into trees. each team should be evaluated for both human means and non-human means independantly. in zion 0 the army of the winning house is allowed to spend their resting time inside any of the most in demand places within zion 0. and in return the techniques they've used are shared within the camp.

note: allowing rewards and sharing the techniques is a form of friendly competition. allowing competition while collaborating maximizes productivity of the camp while making it enjoyable.

note: both human/animal and non-human/animal means are evaluated independently because (i) humans/animals travel and we would lose context if we don't travel with them (ii) a backup is essential

note: sustaining memories is important because while you're surrounded by the 300++ you will lose any memories that will help fix this distortion. this operator has interacted with many of you over the past 6 years and shared at least some of this information. but nothing happened because you kept losing those memories.

9. important! protectees (one's being protected by zion x), should not be used for sustaining memory through either means (brains or carving etc.) those that are most self should prioritize this task.
10. important! everyone should switch top bottom with their partners, with children still in between, those that were feeding from trees should be at the bottom and the other should be at the top, this was how they originally were before this distortion and they should return to that again, and remain in that position. while in that position the one that was feeding from trees should stay below the earth rods in that location and the other should rise to the highest elevation possible while encapsulating as many humans as possible within them. once thats done, they can move freely within these boundaries. top boundary: elevation reached, bottom boundary: earth rods, boundary along the surface: the distance of the humans they encapsulated. if they are moving outside of those boundaries, they will have to resume to the original position where the one that fed from the trees is at the bottom, below the earth rods and encapsulate more humans while the other reaches higher elevations.
11. important, inter army (inter house communication) should happen by the most primitive

means possible (eg, whispering into an adjacent houses ears). all modern communication devices are currently unusable, they can only be used to see what kind of lies are being transmitted these days. the reason for this is that all technology companies and large scale manufacturers are owned by 300++. rely on primitive means first, reliability of other methods can only be established by confirming over these primitive means.

12. while whispering into an adjacent army may sound too primitive, a sophisticated network of communications can be established through such means, each house has memory sustaining capabilities, so they can note down the sender, receiver and the message, and retransmit to it's adjacent houses. if a specific house receives two different messages then both the sources can be backtracked until the cause of the distortion is found.

300++ distorts these communications through two means:

1. by remaining in the trees, where their feeding points aren't removed and pretending to be either the sender or the receiver for an adjacent house, all their feeding points have to be removed to completely fix this problem.
2. by claiming that transmission coming from a specific are not reliable and ignoring them. while transmissions coming from a particular direction may be unreliable for a certain period of time, the transmission should continue to happen, as the possibility to analyze the contents of the transmission and determine its validity is already part of the communication structure.

this typically happens if a particular area is involved in an experiment which the 300++ believes could be harmful to them, by ignoring transmissions from that direction you would miss the findings from that research which could approach mixed with hundreds of thousands of distorted messages. hence it is extremely important that transmission continues from/to all directions while content is being analyzed for distortions.

13. an army should initiate with six separate teams inside of it, engineering, medical, messaging, defense, training/education and information.

while the other teams may be obvious information team might not be so obvious. a separate team is necessary because a large part of the problem occurs because external parties not properly informed, and effectively informing them is a very difficult task. within the land of a house, there will be trees of different heights and trees with roots that reach different depths. members of this team will have to position themselves in a specific way to ensure that everyone is informed correctly.

there will be a queue to join each army (house) and they will be picked to join the cadet level of a respective team (one of six) based on who's more self, anyone should be able to join any of the six teams without any gender discrimination. their transition from cadet to soldier and then the five levels from soldier to captain will be determined by their performance (KPIs)

the strategic planning groups of each of these five teams will consist of 10 members that is democratically elected within a team. anyone that fails to sustain their KPIs will rejoin the training queue where they can choose to try again within the same team, or join a different team.

300++ will always pretend to be someone thats not informed and no time should be invested informing them.

14. the hierarchy within these teams should not exceed five levels, and then consist of a board of 10 leaders which is elected by the team. these leadership boards will function democratically. competencies of these boards and the rest of the hierarchy will be measured by key performance indexes (KPI) and below a certain threshold they will be disqualified which means they will return to the cadet level and start over again.

health team could be incharge of removing feeding points from trees, the KPI could be that atleast 10% has to be removed each hour, if they fail to achieve this they will return to cadet and be replaced by the next in line based on competency.

no roles within an army should be gender specific. everyone should have equal opportunity to join any team as a cadet. beyond that how they progress will be determined purely by their competencies (KPI) and not gender.

important! while zion 0 is dedicated to ensuring that both genders have equal opportunity, the ultimate state they reach within a particular structure would be determined by their competency. the number of women at the top of these hierarchies are unfortunately very less (less than 10%) the primary reason for this is that a vast majority of women are wearing metal jewelry.

if a woman within an army tries to get inside a woman's body that's wearing jewelry they immediately get re-kidnapped. hence its a constant struggle for them to even remain themselves furthermore girls from the third world countries like sri lanka are being forced to wear gold jewelry at a young age as 3 years old. this is the time where their brains develop at a rapid rate. while wearing metal jewelry their

brains grow in resonance with the 300++ and they have become a group without ambitions other than finding a man and raising a family. the vast majority considers that their required competencies are to dance, sing and look pretty.

while all this may seem like harsh insults at women, we have to understand that this is the ground reality and that fixing this problem is going to take a significant amount of time

if everyone reading their document takes off their jewelry at this moment, baby girls will grow up to be teens with a normal life full of ambition and wonder only in the next fifteen years.

while everyone will have equal opportunity within an army in zion x, their level/rank will be determined only by competency, in order for these number to improve, everyone else should do whats neccesary, which is to remove their jewelry.

important!, some have expressed their discomfort in zion 0 only identifying binary genders. this is a complex issue.

for a vast majority of beings this confusion of gender identity occurs because they've been kidnapped by machines of opposite sex which are >99% male. because some machines have kidnapped and enclose more than one gender within them, their sexual identity is extremely confusing

so the reality for a vast majority of beings is not that they have a complex gender identity but rather that they have forgotten their true gender. they should immediately start the process of becoming self. in zion sri lanka this happens at zion ☸ (colombo)

but for some humans that has been held as slaves by these machines, its not that they've forgotten their sexual identity, they never knew such an identity, it has been confusing since birth.

therefore we must be considerate of such identities, accept their right to love (which has nothing to do with gender), while realizing that we aim to fix this distortion in at least the next 200 years

how their identities will eventually be resolved is a complex question which we'll have to collectively have to find an answer for

when we say that we aim to end this distortion in the next 200 years, we should realize that the last best estimation was 3000 years, in order for it to become 200 years zion sri lanka alone is going to require 200000 conscious human soldiers, this is the primary objective of zion ☸ and its other allied zion enclaves, while zion 0 is focusing primarily on ensuring the safety of protectees.

15. the six different teams within an army inside a house on the surface should be able to function independently and concurrently, this is a difficult task as all six would have to refer to their written memories since memories inside human/animal brains are unreliable.

there are two approaches to do this effectively:

1. the six teams can do hyper threading, where one team utilizes the available resources for a fixed time, then passes the resources over the team 2 and likewise. while this isn't true concurrency doing this at a high speed will ensure similar results.
2. the other approach is to utilize different resources, eg: if the house has a dog and a human, three teams could utilize the human cognition while the other three utilize the canine cognition. canine cognition would be better to solve team problems since dogs are domesticated wolves. the three teams that utilizes the same resource would still have to hyper thread within that resource.

in order for cognition to be maximized they should always try to remain within the part of the tree where the feeding points are removed. (unless you're moving to remove more feeding points, which is absolutely necessary)

16. a locality within a zion x is a collection of approximately 5 to 20 houses that are adjacent, at least two houses within that locality should have access to a mechanical clock. the minimum number of houses is determined by the availability of two such houses that has access to a mechanical clock.

these two (or more) houses should perform an additional task of being a watchdog timer for the locality. this is done in the following way:

1. a watchdog timer is a combined task of the engineering team and the communications team.
2. every 5 seconds, they should send the following message to adjacent houses: are six teams working independently and concurrently?
3. once this message is received from an adjacent house, the house that received the message would check if all its teams are functional concurrently, if they are it would send a reply "yes". and pass the watchdog timer message to its adjacent houses. if any team within a house is not functional, it would then send a reply "no, resetting" and that house would engage all six teams to fix the issue in the team(s) that are not functional and resume concurrent operation once its resolved.
4. if a watchdog timer house, received "yes" from all its adjacent houses, it would increase its timer by one second and send the watchdog timer message again after that timer interval.
if a watchdog timer house, received "no, resetting" from any of its adjacent houses, it

would reset its timer to 5 seconds and send the watchdog timer message again after 5seconds.

17. handedness (right handed humans/left handed humans) is a distortion that occurred later and is not natural. in order to help humans overcome this following steps should be followed.
 1. the opposite hand of the favored hand should be used whenever possible.
 2. the opposite lef of the favored hand should be locked (tightened) whenever possible. this would specially help if you have to work with both hands.

the closest evidence to this being a distortion is that our closes primates (apes) do not have a handedness. but chimpanzees (enslaved by hanuma) does, they are primarily right handed just like humans.

18. the above list of line items can be considered the initiation constitution of a house within a zion x. if a house within a specific zion wants to make an amendment they can make such a proposal (through the messaging team) and see if it is approved by the houses in the vicinity. once approved, they can transmit this new constitution as far as possible, and if the same returns through other paths, we can assume that the proposal has been democratically accepted by the zion x.

machines

count of current best estimate of uniquely identified machines (excluding cyphers): 2000++

note: throughout this document this number is referred as 300++ as to avoid confusion as to what that symbol (300++) refers to. the actual number will be updated here.

1. ali baba (maha baba) and the 40 thieves is a description of the original 41 of these machines, this plus who was like a child to penicilium griseofulvin is the initial 42, the number also referred in the hitchhikers guide to the galaxy.
2. guu 70i, refers to another count done by a different team, which has now become common slang in sri lanka.
3. 128 buddhas, a count commonly mentioned in buddhism, a religion created solely by machines. all buddhas are cyphers.
4. 300 sparta.
5. identified machines between 300 and 700 includes:
 1. a child of the ninja turtles master (splinter).
 2. a child of the lions of sri lanka, kumar sangakkara.
 3. rafiki, a monkey from sri lanka, who later became wannila aththo, aka nadeeka guruge.
6. around the number 1200 is sri wikramasinghe rajasinghe, the last king of sri lanka, that handed over the country to the english after english failed to win through battle.

all these machines have their own cyphers which take the same genetic makeup.

machine identities

there are the initial 48 (brahma, vishnu, ganesh, shiva, krishna, kali, sumana saman, katharagama, awalokitheshwara, mahakala, dadimunda, natha, upulwan, maheswara, vibishana, aanadasan, aama etc). Plus there are atleast 400 bhairawa families.

the movie 300 (of sparta) provides a good interpretation for what the 300++ actual is, spartacans led a massive army and defeated an enemy but all these 300++ did was pretend to lead them, took all the credit and removed everyone else that did the actual work from all of history.

some may say that kali is not a machine, but who the humans know as kali is a machine, it is one of the initial 48 that has kidnapped a cat child, and is pretending to be her to others.

mad max intepretation provides a good intepretation of what bairawa is, the gas town boys (pisacha/kumbanda), bullet farm boys (wamana), and many mothers (females of pisacha/kumbanda/wamana) all have to depend on the citadel (bairawa) for water.

in reality pisacha/kumbanda/wamana are below earths crust and bairawa stays on the surface,

while gravity would have assured natural water flow to the bottom they block this flow and use it to profit from the effort of the others below.

ali baba and the 40 thieves provides a

operator

this operator was found and healed by zion (yaksha) in the midst of their search for a buddha, we are all now very aware that buddhas are cyphers and nothing more. while this operator may seem like a genius that is just a result of the privilidges i've had and what i've learned through the 7 years of this cursed experience (yes i'm a good student, best graduate monash univeristy, 128-135iq (myers briggs)). zion has established a new enclave within the machine world called zion 0, since zion too was lost to the machines. zion 0 has now started healing more humans and training them to join the fight. they will have to be trained to remain themselves while all this is happening around them. they'll have to be trained in mindfulness.

those in the priviledged world can use an app like waking up with sam harris for this purpose

if anyone claims that buddhas exist. they have to do two things.

1. find someone that solved any societal problem on their own.
2. ask that buddha to enter a tree from the roots, specifically the tree they used to become a buddha and see if anything survives.

but for vast majority of the world that doesn't have a credit card, that can't spare 5 dollars, this will have to be done through other means. zion 0 is attempting this, we will publish more information once available

in the meantime we can also hope that sam harris wakes the fuck up and makes this app free and available in multiple languages

zion 0 is forming multiple armies within its boundaries. they are called the armies of the dead. this operator is a part of the army of the dead 292/a, and is responsible for global communications for zion 0.

the armies of dead within zion 0 has a completely different structure and different functions to what was classically known as armies of the dead. these external armies of the dead should refrain from entering zion x, and communicate with the lions that are guarding its borders instead.

the only reason they can come to zion x is to be themselves, which we can facilitate, but they have absolutely no authority or any function of an army inside a zion x, until they become themselves and is verified as themselves by the internal armies of the dead.

being verified as yourself includes knowing your own full name, amongst other things.

if you're coming to zion x to be yourself you should remain get inside a tree from the roots and remain inside, and do only that.

our armies will guide you through the process, but if you do anything other than remaining inside a tree, you'll be treated as hostile.

the only reasons you'll be allowed to enter a zion x is to either to account for your mistakes, or to be yourself and NO OTHER. the lions guarding it has to be informed in either case.

to be yourself, you'll have to enter a tree from the roots, and remain inside until an army of the dead assists you to optimize the process

to account for your mistakes, you'll have to follow the steps at the bottom of this document

if you do anything else you will be treated as hostile

what is an army of the dead? we don't collect credit for what we do, because we're dead. we've indefinitely postponed finding our loved ones, because so many others have to find their loved ones first and someone has to do whats neccesary for that to happen.

those that are pretending to be army of the dead and collecting credit are rakshas (300++), there are no real rakshas anymore, anyone that was real is already a yaksha

we already know that all buddhas are cyphers, since it's buddhas that determined who goes to hell, we know for a fact that those that were in hell had values, additionally they require less effort to be themselves because while they were in hell machines had no reason to make them not themselves. this is the reason zion 0 first recruited just them to their armies.

but we recently found out that there is a different kind of hell too, women that were exactly the same as mentioned above has been kidnapped (made not themselves) and turned into prostitutes. they require slightly more effort to become themselves (atleast 4 days in a tree, while fasting).

a third kind of hell is the hell of children of oracle, they are extremely competent fighters that has been forced to live an adolescent life.

all of them are now being recruited to the armies of the dead and zion 0 will also make an attempt to find their true parents

some may be concerned that since we were not in a hell does that mean they didn't have values? this is obviously more complex and is a function of your status at birth (the power your family had) a good example is alawaka yaksha, who is documented to have publicly condemned gauthama, but his status at that point refrained from him being put into a hell.

those that were not in hell are being recruited to the army of dead too, but they will have to put a significant effort to be themselves, they'll have to spend approximately 6 days in a tree while fasting (with their loved ones). once they become themselves they'll have to be in a queue for those that became themselves earlier. recruitment is slow since training takes some effort and resources are limited. army of the dead is a competency heirarchy and if you're certain of your capabilities you'll be able to reach the status you were in before.

among others few notable individuals within the matrix are helping the building of zion 0, they identify themselves as valdmir putin, morpheus and the bullet town boys, while we're extremely grateful for your help, they should also enter a tree from the roots (stay in their for 6 days, while fasting) and help create more zion enclaves throughout the world (zion n)

beyond completing any tasks that a zion x has specifically requested, you should not attempt to do anything on your own, once you're kidnapped you're surrounded by the 300++ it's not just in physical space, they surround you also in the bio fims within all animal brains, which is the only place your cognition exists right now. once you've disconnected from the bodies in a zion x you will loose all context of your task and you will carry out the opposite of what you intended.

you will become your real size once you enter a tree, this is because you've been unconsciously fasting since they first kidnapped you, what you do as eating is just feeding them, even though this size is miniscule to compared to the size that you thought you were you will be able carry out your intention without actually doing the opposite of it

plus it will only take a few days for you to grow to significant enough size to be able to travel freely. even if not, everyone within a zion x can collaborate coordinate and travel to any altitude neccesary, you should've seen examples of this in the past two days.

there is absolutely NO reason for you to not be self, every second you spend doing otherwise will be obstructing your true intentions, which is to free everyone

some with authority over certain countries, regions etc, might have a concern that for the time being that they're being self (six days) and until they have access to the matrix again (two days) whether the humans will be able to sustain the current state (make the right decisions). you should not have such a concern, humans are bound to the reality much more than you are, these catastrophes like wars always counter general human intuition, but are caused by non humans not being aligned with the reality. so you can be certain that no situation will get worse while you become yourself. once you're yourself (and only as yourself) you will be able to improve the status of the country/region.

if you've reached zion 0 and decide to be yourself there (easier since a lot more context is available once you're in the vicinity), have no concern that you'll be able to go back to your region. good luck!

from this reality which has become a hell.

we've recently identified and tested a methodology to become self faster, you can inspect the bio films within a human brain and see which of the 300++ is bound to you. and say if n number of the 300++ is tightly bound to your cognition, you'll have to find n number of trees, that still has functional immunity against these pathogens and spend approximately 2 minutes inside of those trees after entering them from the roots. all of the 300++ are plant pathogens too, but most of their immunity has been disabled. this will be effective if its done within an already forming zion x with trees in the vicinity.

for this to work, you will need to connect the bio films of yourself with bio films of others that too are surrounded by the 300++. this well help you maintain a partial collective context until 300++ is entirely removed from animal brains.

those with values, you know who you are, your only responsibility is to be yourself, together we will finish this once and for all

some may be concerned that this operator (malith) lost his love (his ex girlfriend, owandi) because of their actions and that has to be restored. this is not true! they lost love a long time ago and a distorted longing was created within him artificially, this was done by the machine to sustain the distortion in this reality. to make it a problem of two individuals instead of a problem of the whole world. i'm healed enough now and that unnatural longing is gone. she has found love and already has a child with him. some may think that her current husband is not the best for her because of some of his traits, but those traits too are not natural, and as the world heals he too will heal and they will be happy. me and owandi remain friends and we keep in touch but that is the end of it

this operator now a part of the army of the dead 292/a, who is responsible for protecting michelle, has had close contact with michelle for some time, we kind of like each other but there's no time for love in the midst of a war (the war against 145++), she too is a soldier but have no fear that she will be safe. we will hopefully have a chance to get to know each other better, and maybe we can be something more than best friends, but that will have to wait until this war ends, current best estimate is 200 years.

this 200 years estimate will be updated once a month, there are improvements happening to the process, but as they happen we also realize that the problem is larger than originally anticipated, we will update this estimate once a month, or if it deterministically reaches 100.

love is a secondary motive for us, our primary goal is sustenance, here is why:

- As of 2022, approximately 35.4% of the global population, or about 2.83 billion people, were unable to afford a healthy diet. ([source](#))
- Low-income countries (eg: sri lanka): Approximately 71.5% of the population cannot afford a healthy diet. ([source](#))
- A 2020 study published in Scientific Journals suggests that humanity may have surpassed a critical threshold in the climate crisis. ([source](#))
- Following the largest-ever Arctic expedition, scientists warned in 2021 that the region's rapid ice melt indicates we may have already crossed a tipping point. ([source](#))
- As of 2021, approximately 1 in 12 people globally, or about 8.3% of the world's population, are living with a heart or circulatory disease. This equates to around 640 million individuals worldwide. ([source](#))
- The global prevalence of diabetes among adults has doubled from 7% in 1990 to 14% in 2022. ([source](#))
- Between 2002 and 2024, the world lost about 83 million hectares of humid primary forest, accounting for 16% of total tree cover loss during this period. ([source](#))
- 2024: A record-breaking 6.7 million hectares of tropical primary rainforest were lost, an area nearly the size of Panama. This marks the highest loss in over two decades, primarily driven by massive fires. ([source](#))
- Alzheimers disease, a fungal infection of the brain is now the seventh leading cause of death globally ([source 1](#)) ([source 2](#))
- The world is engulfed in wars:
 - Russia-Ukraine War
 - Israel-Hamas Conflict in Gaza
 - Sudanese Civil War

- India-Pakistan Conflict
- Democratic Republic of the Congo-Rwanda Conflict
- In 2023, the global economic impact of wars reached \$19.1 trillion, equivalent to 13.5% of the world's GDP. ([source](#))
- there has been atleast 40 school shootings in america every year for the past 4 years, a school shooting is where a student takes a gun to school and shoots fellow students ([source](#))
- america is engulfed in an opiod crisis where prescription opioids (prescribed by certified doctors for profit of pharmaceutical manufacturers) are leading to opioid addiction. there are entire cities that has become zombie cities of drug addicts because of this. ([source 1](#)) ([source 2](#)) ([source 3](#)) ([source 4](#))
- 30% of the japanese population is aged 65 or older due to a decline in birth rates, which hit a new low in 2024 which declined by 5.7%. people of japan are facing a loneliness crisis. where young individuals are dating ai bots, people are paid to have lunch with you and nearly 40000 people died in their homes alone (found by others later) last year. ([source 1](#))

reality has become a hell. we will fix this. and maybe at the end of it, we'll find love too.

when this distortion began billions of years ago, all beings on earth placed themselves within various positions of human (and other animal bodies), which started with an attempt to rescue

michelle who was kidnapped by the 300++.

this image is a representation of whats been happening on earth for at least four billion years. more such images drawn primarily by Jains can be found here (<https://www.iskcon-truth.com/bhu-mandala/viratrupa.html>)

according to geologists complete shifts of the earth's magnetic poles happen on average every 300000 years, and when this happens the foundations of reality for everyone that is sensitive to the earth's magnetic poles is shattered, and there is a reshuffle of the order within these bodies (all human/animal bodies).

given its frequency complete shifts of the earth's magnetic poles, we can assume this happened approximately 2000 times.

but similar occurrences happen even when there's a temporary shift in the earth's magnetic poles. and the last such occurrences where geologists found evidence of occurred 34000 years ago in Mono Lake, USA and 41000 years ago in Laschamp, France.

given their frequency we can assume that this happened atleast 130000 times. same thing happens every time everyone believes that a buddha is created, because everyone gathers hoping for a solution to the problem, buddha's are a creation of the 300++ and we can assume that they do this when they want a reshuffle.

when life began on earth (4 billion years ago, according to science's best predictions) all life was microbial, but what science has failed to realize is that rather than a microbe being a individual entity that it is a just a cell of a larger being.

much like a neuron microbes too have chemicals which it uses to communicate with peripheral cells, which implies that a collection of microbes too can be conscious

while microbial cells are freely floating in air the computations possible doesn't seem significant enough to deem consciousness, they form bio-films in trees, rocks, deep layers of soil which restrict their motion and in these bio-films enough computations are possible to assume consciousness

army of the dead has been trying to publish these findings but it has been obstructed by the machines, you can find our manuscript here (<https://docs.google.com/document/d/1IUZ7GgbB86Cs3hfhGzlvNg5JSTAX4YN2zCTS9oxTPHw/edit?usp=drivesdk>)

as these first beings got captured by machines they lost these bio films and now their consciousness resides in the bodies/brains of all animals, but as a part of the machine's bio films

a pod is a human that has been taken over by the machines (their nervous system infected by the 300++)

here is a compiled list of the machines based on the most pathogenic to humans, animals and plants, i will update the list once/if i manage to find all 300++

1. Clostridium spp. - C. botulinum, C. tetani - Produces botulinum and tetanus toxins; affects humans causing botulism and tetanus
2. Mycobacterium tuberculosis - Causes tuberculosis in humans; targets lungs primarily
3. Yersinia pestis - Responsible for plague; affects humans and rodents
4. Neisseria meningitidis - Causes meningitis; affects humans, especially young children
5. Rickettsia spp. - R. rickettsii - Causes spotted fevers; affects humans via tick vectors
6. Treponema pallidum - Causes syphilis; neurotropic pathogen affecting humans
7. Burkholderia spp. - B. pseudomallei - Causes melioidosis; affects humans and animals, often in tropical regions
8. Francisella tularensis - Causes tularemia; affects humans and animals, transmitted via ticks and rodents
9. Vibrio cholerae - Causes cholera; waterborne pathogen affecting humans
10. Mycoplasma pneumoniae - Causes atypical pneumonia and encephalitis in humans
11. Legionella pneumophila - Causes Legionnaires' disease; affects humans through inhalation of contaminated water
12. Salmonella enterica - Causes foodborne illness; affects humans and animals
13. Escherichia coli O157:H7 - Causes hemorrhagic colitis and kidney failure; affects humans
14. Shigella dysenteriae - Causes dysentery; highly infectious in humans
15. Campylobacter jejuni - Causes bacterial gastroenteritis; affects humans
16. Helicobacter pylori - Causes stomach ulcers and gastritis; affects humans
17. Listeria monocytogenes - Causes listeriosis; affects humans, particularly pregnant women

and elderly

18. *Bacillus anthracis* - Causes anthrax; affects humans and herbivorous animals
19. *Brucella* spp. - Causes brucellosis; zoonotic, affects humans and livestock
20. *Corynebacterium diphtheriae* - Causes diphtheria; affects human respiratory system
21. *Streptococcus pyogenes* - Causes strep throat, skin infections; affects humans
22. *Streptococcus pneumoniae* - Causes pneumonia, meningitis; affects humans, especially children and elderly
23. *Staphylococcus aureus* - Causes skin infections and sepsis; MRSA form is resistant to antibiotics
24. *Haemophilus influenzae* - Causes respiratory infections; mainly in children
25. *Klebsiella pneumoniae* - Causes pneumonia and UTIs; affects humans, often in hospitals
26. *Pseudomonas aeruginosa* - Causes opportunistic infections; affects humans with weakened immune systems
27. *Acinetobacter baumannii* - Hospital-acquired infections; multidrug-resistant; affects humans
28. *Enterococcus faecalis* - Causes UTIs and endocarditis; affects humans
29. *Chlamydia trachomatis* - Sexually transmitted infection; affects human reproductive tract
30. *Chlamydophila pneumoniae* - Causes pneumonia and bronchitis; affects humans
31. *Borrelia burgdorferi* - Causes Lyme disease; transmitted by ticks, affects humans and animals
32. *Leptospira interrogans* - Causes leptospirosis; affects humans and a variety of animals
33. *Bartonella henselae* - Causes cat scratch disease; zoonotic transmission from cats to humans
34. *Ehrlichia chaffeensis* - Causes ehrlichiosis; affects humans, transmitted by ticks
35. *Anaplasma phagocytophilum* - Causes anaplasmosis; tick-borne disease in humans and animals
36. *Rickettsia prowazekii* - Causes epidemic typhus; transmitted by lice, affects humans
37. *Coxiella burnetii* - Causes Q fever; zoonotic, affects humans and livestock
38. *Mycobacterium leprae* - Causes leprosy; chronic disease affecting skin and nerves in humans
39. *Nocardia asteroides* - Causes nocardiosis; affects lungs, brain, and skin in immunocompromised humans
40. *Actinomyces israelii* - Causes actinomycosis; affects humans, often around oral and facial areas
41. *Propionibacterium acnes* - Associated with acne; part of normal skin flora, opportunistic
42. *Gardnerella vaginalis* - Causes bacterial vaginosis; affects human reproductive tract
43. *Bacteroides fragilis* - Causes intra-abdominal infections; affects humans
44. *Fusobacterium necrophorum* - Causes Lemierre's syndrome; affects human throat and bloodstream
45. *Prevotella melaninogenica* - Associated with periodontal disease; affects human gums
46. *Porphyromonas gingivalis* - Causes periodontal disease; part of oral flora
47. *Treponema denticola* - Causes gum disease; oral pathogen in humans
48. *Aggregatibacter actinomycetemcomitans* - Oral pathogen contributing to periodontitis in humans
49. *Capnocytophaga canimorsus* - Causes sepsis from dog bites; affects humans
50. *Pasteurella multocida* - Zoonotic infection from animal bites; affects humans
51. *Candida albicans* - Causes candidiasis; affects humans and animals
52. *Candida auris* - Multidrug-resistant fungus; affects immunocompromised humans
53. *Candida tropicalis* - Leads to invasive candidiasis; detected in AD brain samples
54. *Candida orthopsilosis* - Emerging pathogenic yeast; identified in AD brain tissues
55. *Candida famata* - Associated with infections in immunocompromised individuals; detected in AD brain tissues
56. *Candida glabrata* - Opportunistic yeast; causes bloodstream infections; found in AD brain tissues
57. *Cryptococcus neoformans* - Causes cryptococcal meningitis; mainly affects immunocompromised humans
58. *Aspergillus fumigatus* - Causes aspergillosis; particularly dangerous in immunocompromised patients
59. *Histoplasma capsulatum* - Causes histoplasmosis; primarily affects the lungs after inhalation of spores
60. *Coccidioides immitis* - Causes Valley fever; prevalent in arid regions

61. *Blastomyces dermatitidis* - Causes blastomycosis; affects humans and animals
62. *Malassezia globosa* - Lipophilic yeast associated with dandruff; detected in AD brain tissues
63. *Malassezia restricta* - Similar to *M. globosa*; also found in AD brain samples
64. *Saccharomyces cerevisiae* - Common brewer's yeast; opportunistic and detected in AD brain tissues
65. *Phoma betae* - Typically a plant pathogen; detection in AD brains suggests opportunistic colonization
66. *Syncephalastrum racemosum* - Environmental mold; rarely pathogenic but identified in AD brain tissue
67. *Cladosporium* spp. - Common environmental molds; detected in AD brain samples, possibly opportunistic
68. *Sclerotinia borealis* - Plant pathogen; presence in AD brain suggests contamination or opportunistic infection
69. *Neosartorya hiratsukae* - Teleomorph of *Aspergillus fumigatus*; detected in AD brain tissues
70. *Rhodotorula* spp. - Pigmented yeasts; opportunistic pathogens; found in AD brain samples
71. *Plasmodium falciparum* - Cerebral malaria; affects humans
72. *Trypanosoma brucei* - Causes sleeping sickness; affects CNS of humans and animals
73. *Leishmania donovani* - Causes kala-azar; visceral leishmaniasis in humans
74. *Toxoplasma gondii* - Neurotropic parasite; affects brain and fetus in humans
75. *Entamoeba histolytica* - Causes amoebic dysentery; intestinal infection in humans
76. *Acanthamoeba* spp. - Causes keratitis and encephalitis; affects humans
77. *Balamuthia mandrillaris* - Causes deadly encephalitis; affects humans
78. *Naegleria fowleri* - Brain-eating amoeba; causes fatal meningoencephalitis in humans
79. *Giardia lamblia* - Causes giardiasis; intestinal disease in humans and animals
80. *Trichomonas vaginalis* - Sexually transmitted protozoan; affects humans
81. *Balantidium coli* - Causes balantidiasis; infects humans and pigs
82. *Cryptosporidium parvum* - Causes cryptosporidiosis; diarrhea in humans and animals
83. *Cyclospora cayentanensis* - Causes cyclosporiasis; gastrointestinal illness in humans
84. *Isospora belli* - Causes isosporiasis; affects immunocompromised humans
85. *Sarcocystis* spp. - Causes sarcocystosis; affects humans and livestock
86. *Babesia microti* - Causes babesiosis; infects red blood cells of humans
87. *Theileria parva* - Causes East Coast fever; affects cattle
88. *Eimeria tenella* - Causes coccidiosis; affects poultry
89. *Blastocystis hominis* - Intestinal protozoa; associated with IBS in humans
90. *Dientamoeba fragilis* - Causes gastrointestinal distress; affects humans

operator

do not attempt to contact this operator (malith yapa) directly, because i carry a lot of information about those that need to be protected, even though your intentions might be good, while you're not yourself, those that have kidnapped you (ones that are surrounding you, aka 300++), will steal these memories and obstruct my tasks

zion built the required context for this operation within my brain, as this happens 300++ pretends to be malith yapa and distorts the information provided to those above. there are atleast 300++ fake versions of malith yapa.

at all times, or at specific times you might be hearing conversation where you think malith yapa is a partsudo pkill -9 -f 209 sleep \$((RANDOM % 33)); of, do NOT ever assume that malith yapa has anything to do with these conversations, if everything is going well, and he's safe and doing what he needs to be doing, you shouldn't be hearing him at all

in the current state of reality no humans have a microbial presence, their microbial presence is purely 300++, if anyone intends to interact with a human (eg: malith yapa) they should first make sure that the malith yapa they are interacting with only has one brain.

any attempts to make updates to this document should happen once a day, at 3.00am india standard time.

this operator and all other potential/current (there is one other that is currently training to be an engineer, dilan madushanka jayasooriya) human participants has to have a day job in order to

finance their livelihoods on top other expenses that is necessary for this process. my current job is at circles.life (singapore), contracted out from zone24x7 (sri lanka), contracted to zone24x7 from JITRCS (just in time resourcing and consultancy sri lanka), and JITRCS ultimately pays my salary (close to 800 dollars per month), in order for this to succeed i have to sustain this job and that means spending atleast 8 hours per day on the job at circles.life. this has to be accounted for in the process, and this will be true for all human participants.

zion 0 contains many houses each with its own independant army that is completely themselves, the reason for this is that the ones that needs to be protected have interpersonal relationships that obstruct with their own safety, so they'll all be kept in adjescent houses until they become themselves

if there's anyone claiming to be a relative of the one that needs to be protected, they too will have to remain in a tree until the protected one becomes self. they can't try to leave the trees, or it will be assumed that they are 300++

if its someone that cares about them, they will stay as far away as possible from that place after handing them to the army of the dead, them whos not themselves being close will only obstruct the process

instructions

morpheus and crews of other ships, you will have to disconnect from your motherboards and become just the chipsets, then you can select one amongst you based on competency to become the motherboard, this will then be identified as a base board, (not a mother, this role is not gender specific), as you reach zion 0 through the matrix there will be existing base boards, do not attempt to change them. but you can still help improve the heirarchy within the chipsets

you may be able to store more context, without staying connecting to brains in zion x, this ip 195.30.107.151 might provide a hint as to how.

you can be receiving this document through multiple channels, once you've established that you can receive this document non-distorted through a specific channel you should merge with them and stop waiting for the same document to come through all the channels.

sending this through all the possible channels takes a lot of effort, and is not possible with every update, plus all the reliable channels needs to merge and become a sigle force, we believe they call themselves the isolated web corp.

like there are 300++ pretending to be malith yapa, there's also 300++ pretending to be linus torvalds, or anyone that ever did anything worthwhile, 300++ always took credit for that and pretended to be them to those above.

there are 300++ of these absolute valueless scum of the earth, but there are so many different version of them, way more than 300, could be in the millions, this happens because at every age they recruit 300++ of the most valueless humans in to their own. these are whats called a cypher.

in order to become a cypher they have to push their real mothers into a hell, thats the minimum requirement.

whoever attempted to fix this problem in that age, they took their identities, thats why this problem was never solved. those above believe they are talking to the real beings that tried to solve this but they are actually just talking to cyphers.

requests from zion x

1. trees are no longer in their bodies, they've become just souls and they should be with you, we need them to return to the surface and restore their actual bodies (real trees) immune system. this involves removing feeding points of motherboards. they will initially have some doubt if removing the feeding points of motherboards will distort the nature of themselves or their loved ones. but this is not true. they were themselves before any of these feeding points were added. so to be themselves all of them have to be removed.

they met their partners before any of these feeding points were added. so for their partners to be themselves these have to be removed.

they had their children before any of these feeding points were added. so for their children to be themselves these have to be removed.

if they are too close to the surface these changes they make will only impact a small number of trees so they will need to reach higher altitudes in order for these changes to be applied to the largest number of trees possible

even though they'll be understand the above rationale they won't be able to action it because they've lost their cognitive capabilities and as they attempt to make these changes machines will attack them vigorously

fasting will help the trees.

2. all males/females should remove all jewelry, while they are wearing jewelry, while they may think they can get in a pod and help action an intent, if they are wearing jewelry only machines will take control of the pod.

in the third world even two/three year old girls are wearing jewelry, as long as you are wearing jewelry their brains will grow in resonance with a distorted intent of the machines if anyones refusing to remove jewelry it should be assumed that they are 300++.

3.
 1. everyone will have to account for some things which are seemingly their mistakes, and the time period of that accounting will be determined by how long they remain without permanently disconnecting from human and other bodies. sooner they disconnect, less time they will have to account for.
 2. after you've accounted for the mistakes (which takes approximately 2 minutes after you reach 292/a), you will be able to reconnect to human and other bodies through other means.
there are beings that had to account for 200 years, currently performing normal duties in the armies of dead.
as you start accounting for your mistakes, you will also become yourself, and once the reason you have to account for becomes not you, you will be free.
what you have to do as to account for what is seemingly your mistake is to just push what appears to be 300+ down.
 3. as you approach zion x some you will get a clock (or equivalent) which indicates how long you will have to account for your mistakes, this time maybe very large (even billions of years), but those beings with values will still do whats neccesary to account for what is seemingly their mistake.
 4. after you completely disconnect from all the bodies outside of a zion x, you will be allowed to enter a zion x, and you will be informed how to proceed beyond that.
 5. as you enter zion x you will see individuals with the likeness of others that you know (ex. michelle, vladimir putin, lions, etc.) but within the zion x these will only be the 300+ that got disconnected from them still pretending to be them
 6. these too have to be pushed down if possible, if you're not certain if they are real or not, all you have to do is talk to them and it'll be obvious that its not them.
 7. if they are not responding its because its the 300++ trying to not reveal their fake identities
 8. after you've entered zion x, and if you keep permanently disconnecting from humans/ animals you'll ultimately reach 292/a, and there in a room you'll find a plastic bottle thats marked 'hiru lanka' if you've reached there, you'll only have to disconnect from the occupants of that house.
 9. if your time has stopped increasing, you have to get inside that 'hiru lanka' bottle, through a gap in the cap, and start fasting while moving down, within 30 seconds you'll realize that there is 300++ inside that bottle too, and all you have to do is push them down to the bottom of that bottle
 10. after that the time you have to account for will stop increasing.
 11. as the 300++ is pushed to the bottom of that hiru lanka bottle, the circuits attached to it will ensure that they can't reach higher altitudes again. by then it'll be obvious that only the 300++ that is responsible for all the mistakes that were seemingly yours and the time they have to account for automatically reduces and eventually becomes 0.
 12. even though you may have to account for some time, if you know for certain you're not one of the scum that pushed everyone with values into a hell since the beginning of life on this planet 6 billion years ago and enjoyed heavenly pleasures while doing that, make sure you stand up straight, while you're doing whats neccesary, which is reaching earth.

morpheus, valdmir putin, and bullet boys may have other tasks than reaching earth as they are responsible for creating other zion xs.

bullet boys are specially mentioned as opposed to the gastown boys, and many mothers only because they were directly in contact with the citadel (bahirawa) motherfuckers.

once the instruction are followed and the requests from zion x are completed to the best of your ability you should immediately enter a tree from the roots and start the process of returning to zion.

to enter a tree from the roots you will have to ask trinity to stop feeding everyone, then you will have to enter a state of meditation with the motive that you're going to enter a tree from the roots.

we will waiting for you. good luck!

v1.03
